   Columbia University College of Dental Medicine

## Background

- HRSA-funded project to use Service Learning to provide concurrent on-site:
  - Oral health care service to multiply diagnosed people with HIV/AIDS
  - Clinical training for AEGD residents

## **Objective**

 Identify and operationalize a subset of <u>clinical</u> competencies developed by ADEA in '97 for use in training AEGD Fellows to provide oral health care for people with HIV/AIDS.

## Methods

- Interdisciplinary team:
  - Analyzed the 82 original statements for relevance to providing care for people with HIV/AIDS
  - Used an iterative process to focus and select care related competency statements but that did *not* pertain to providing technique-specific care, e.g. endodontic, restorative or prosthetic services for people with HIV/AIDS
     16 competency statements included:

- 19. Select and use assessment techniques to arrive at a differential, provisional and definitive diagnosis for patients with complex needs. (C)
- 20. Obtain and interpret the patient's chief complaint, medical, dental, and social history, and review of systems. (P)
- 21. Assess patient's cultural background and expectations for dental care and perform patient care consistent with that assessment. (P)
- 22. Obtain and interpret elinical and other diagnostic data from dental professionals and other health care providers. (P)
- 23. Use the services of clinical, medical, and pathology laboratories and make referrals to other health professionals for the utilization of these services. (P)
- 24. Perform a history and physical evaluation and collect other data to establish a risk assessment for use in the development of a dental treatment plan. (P)
- 25. Use accepted prevention strategies to help patients maintain and improve their oral health and aspects of their systemic health. (P)
- In regard to treatment of oral disease:
- Obtain informed consent for dental treatment by discussing with patients, or parents or guardians of patients, the following: findings: diagnoses; the risks, benefits, and process of various treatment options; patient responsibilities during and after treatment; and estimated fees and payment responsibilities. (C)
- Integrate multiple disciplines into individualized, comprehensive, sequenced treatment plans for patients with uncomplicated and complex needs. (P) 27.
- Develop and carry out dental treatment plans for patients, including patients with special needs, in a manner that considers and integrates those patient's medical, psychological, and social needs. (P) 28.
- 29. Modify the treatment plan, if indicated, based on therapeutic outcomes, unexpected circumstances or the patient's individual needs. (P)

Evaluate the results of periodostal treatment and establish and monitor a periodostal maintenance program. (P)

Previde comprehensive management and care for individual inputients or same-day surgery patients from the beginning to the end of a patient's bospital experience. (C)

 Perform dontal consultations and request medical consultations for hospitalized patients and patients in other health care settings. (C) Use pharmacologie agents in the treatment of dental patients. (P)

Provide control of pain and anxiety in the conacious patient through the use of psychological interventions, behavior management techniques, local anesthesia, and oral and nitrous utile conscious sedation techniques. (P)

Provide control of pain and anxiety in the conscious patient through the use of parenteral conscious sediation technicase. IC)

Prevent, recognize, and manage complications related to use and interactions of desay, local anesthesis, and conscious solution. (C)

## Methods

### Interdisciplinary team:

- Analyzed the 82 original statements for relevance to providing care for people with **HIV/AIDS**
- Employed iterative process to focus and select statements pertaining to providing nontechnical care for people with HIV/AIDS
  - 16 competency statements included:
- 16 statements narrowed to 5 "competencies" and renamed "responsibilities"

Slide 2 of 4

#### Responsibilities

1. Obtain informed consent for dental treatment. (#26)

Develop a dental treatment plan for a patient (including patients with special needs) in a manner that considers and integrates the patient's medical, psychological, and social needs. (#28)

 Discuss with the patient (or legal guardian of the patient) the following: findings; diagn the risks, benefits, and processes of various treatment options; patient responsibilities durin after treatment; and estimated fees and payment responsibilities. (#26) es during and

Use accepted prevention strategies to help the patient maintain and improve his/her oral health and systemic health. (#25)

Function as a part of an inter-professional health care team such as that found in a best practice hospital, institution, or community health care environment. (#7)

### Methods (cont.)

### • Interdisciplinary team:

- Analyzed the 82 original statements for relevance to providing care for people with HIV/AIDS
- Employed iterative process to focus and select statements pertaining to providing non-technical care for people with HIV/AIDS
- 16 competency statements included: - 16 statements narrowed to 5 competencies and competencies renamed "responsibilities"
- 5 responsibilities statements subdivided into 10 "competency" statements

Slide 3 of 4

#### Competencies

1.A. Identify and document the need for language or "other" (e.g. hearing impaired, etc) in anviens

2.A. Collect information.

2.B. Make a patient centered differential, provisional and definitive diagnosis. (#19)

2.C. Use data collected in A1-5 and B to develop an appropriate patient-centered treatment plan. (024)

3.A. Using the appropriately sequenced treatment plan developed in 2 above, present treatment options to the patient giving all the pros and cons including costs of each option based on patient's needs, abilities and personal preferences. (#28)

3.B. Discuss homecare (patient responsibilities) and disease prevention post-treatment with the patient (or legal guardian) when appropriate.

3.C. Obtain agreement from the patient for the recommended treatment plan. (#26)

4.A. Discuss homecare (e.g., patient responsibilities) and disease prevention post-trepatient (or legal guardian) when appropriate. nt with

4.B. Provide Follow up care.

5.A. Provide direction and expertise to non-dental team members regarding dental care of a

## **Results**

• To focus training and assessment of AEGD Fellows' performance, a comprehensive set of <u>measurable, clinical</u> competencies relevant to providing oral health care for people with HIV/AIDS was operationalized.

## **Next Steps**

- Design competency-based clinical evaluation checklists
- Revise HIV/AIDS curriculum for AEGD residents to be competency-based
