# HELP! I Need a Geek!

Kathy Phipps, DrPH
ASTDD Data Coordinator

### Where to Find a Geek

## Finding a Geek Closer to Home

- State Health Department
  - Epidemiology/Evaluation section
- Local Health Department (in some cases)
- University
  - Biostatistics or epidemiology faculty
  - Graduate student
- ASTDD

# ASTDD Geek Squad

- Mike Manz
  - mmanz@umich.edu
- Kathy Phipps
  - krp123@charter.net
- To request technical assistance
  - Complete request form
  - Email to Stuart Lockwood

Basic Screening Survey & Oral Health Surveillance Request for Technical Assistance from ASTDD	
Contact Information	
Date:	State/Territory:
Contact Person:	
Phone:	Fax:
Email:	
Type of Technical Assistance Requested  Please check the type(s) of technical assistance you anticipate needing. Please note that ASTDD may be unable to cover the cost of all types of technical assistance.	
Basic Screening Survey Related Technical Assistance  Development of survey design including assistance with what age groups to include, what information to obtain, and planning steps  Presentations to advisory groups/statewide meetings (cost must be covered by state)  Sample design, including the determination of sampling frame and potential stratifications or sampling strata  Sample selection, including the selection of specific schools to include in the survey along with replacement schools  Training of examiners (cost must be covered by state)  Data entry (cost must be covered by state)  Data analysis  Report preparation (cost must be covered by state)	
General Oral Health Surveillance System Related Technical Assistance  Development of overall oral health surveillance system  PRAMS  YRBS  BRFSS  Other (please describe):	
What is the anticipated start date of your survey?	
When would you like to start receiving technical assistance?	
Financial Resources  ASTDD does not have the financial resources to provide unlimited technical assistance to all of the states currently requesting assistance. For this reason, we need to determine if a state has resources to cover the cost of some services.	
Do you have any outside funding for portions of this If yes, what is your source of funding?	project? Yes No
Can you help defray the cost of this technical assist If yes, approximately how much could you cover	<del>_</del> _
Please Email the Completed Form to: Stuart Lockwood, Chair, ASTDD Data Committee slockwood@adph.state.al.us

# TA Available Through ASTDD

- Basic Screening Survey
  - Assistance with planning
  - Sample selection
  - Data entry programs
  - Data analysis
- Oral Health Surveillance Systems
  - Assistance with development of a system

### Resources Available from ASTDD

- Epi Info data entry & analysis files
- BSS Planning Guide
- Sample BSS Examiner Training
- Best practices

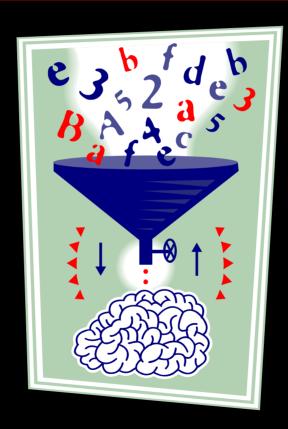

# Engaging the Community

# Engaging the Community

- Important to engage the community prior to collecting data
- Who is the "community"
  - Public
  - Providers
  - Agency staff
  - Research community

# Engaging Your Agency and Research Community

# Why is this Important?

- Can assist with
  - Protocol development
  - Data collection
  - Data analysis
  - Data interpretation
  - Report preparation

# Acronyms Research Community will want to Talk About

MCH

ASTDD

CSTE

BSS

CDC

BMI

IRB & HIPAA

# Human Subjects & Privacy Issues

- IRB review
- HIPAA compliance

### Research & IRB Review

- Institutional Review Board
- Laws require IRB approval for research
  - Federal Policy for the Protection of Human Subjects (the "Common Rule")
  - IRB must review federally-funded research
  - May apply to all research regardless of funding
  - Some state & local laws authorize IRB reviews

### Research & IRB Review

- Legal requirements of IRB review do not address public health practice
- IRB review not required for non-research
- Responsibility to protect human participants in public health practice...
  - Federal, state, & local administrative oversight

### What is Research?

- Common Rule & HIPAA definition
  - A systematic investigation, including research development, testing, and evaluation, designed to develop or contribute to generalizable knowledge

## Characteristics of Research

- Involves living individuals
- Involves, in part, identifiable health info
- Involves research subjects who are selected and voluntarily participate
- Supported by principles of bioethics

### Public Health Practice

- Does not require IRB review
- Making the distinction between research and public health practice can be difficult
  - collection of identifiable health information
  - actual or potential risks
  - further the public good

#### Council of State and Territorial Epidemiologists

Leaders in Applied Public Health Epidemiology

#### **Public Health Practice vs. Research**

A Report for Public Health Practitioners Including Cases and Guidance for Making Distinctions

May 24, 2004

James G. Hodge, Jr., J.D., LL.M.

Assistant Public Health Professor Johns Hopkins Bloomberg School of Public Health Executive Director, *Center for Law and the Public's Health* 

Lawrence O. Gostin, J.D., LL.D. (Hon).

Professor of Law, Georgetown University Law Center Professor of Public Health, Johns Hopkins Bloomberg School of Public Health Director, Center for Law and the Public's Health

With the CSTE Advisory Committee

### www.cste.org

### What is Public Health Practice?

- Proven methods to monitor health status
- Investigate unusual occurrences of disease
- Implement preventive control measures

### Characteristics of Public Health Practice

- Legal authorization
- Government duty to perform activity
- Directed by public health authority
- May involve persons who did not give informed consent
- Supported by public health ethics

### **CSTE** Definition

The collection and analysis of identifiable health data by a public health authority for the purpose of protecting the health of a particular community, where the benefits and risks are primarily designed to accrue to the participating community.

### Public Health Practice

- Identifiable health data may be collected without informed consent
  - acquisition of data is a function to achieve public health goals
  - public has authorized the activity through laws
  - administrative protections of individual interests
  - public health officials are accountable to the public

# OH Surveys - Research or PHP?

- Identifiable health data
  - No Common Rule & HIPAA do not apply
- General legal authority
  - acquire any health data needed to monitor health conditions in the population
- Specific intent
  - test a hypothesis research

# OH Surveys - Research or PHP?

- Participant benefits
  - PHP should contribute to improving health
- Subject selection
  - control group research
  - random selection of participants research

# Other State Surveys

- PRAMS
  - Not research no need to receive IRB approval
- YRBS
  - Non-identifiable health data
  - Not research
  - No informed consent necessary

# Oral Health Surveys

- Three IRBs waived oral health surveys
  - One university IRB
  - Two health department IRBs

## Summary

- OH surveys are public health practice
- Who decides?
  - health agency or IRB
- My recommendation
  - submit letter to IRB
  - ask for waiver

### HIPAA

- Health Insurance Portability and Accountability Act of 1996
- Protected health information
- Covered entities
  - health plans
  - health-care clearinghouses
  - health care providers

### HIPAA

Permits private health information to be shared for specified public health purposes such as surveillance.

# HIPAA & Oral Health Surveys

- Collect non-identifiable data
  - do not collect name
  - collect date of birth only if you need it for BMI calculations
- Protect confidentiality
  - privacy envelopes

### For More Information on HIPAA

- HIPAA Privacy Rule and Public Health
